TnP Prime

Portable Appliance Test and Print Kit

Overview

With 6 generations of industry respected models and a proven pedigree, you can rely on the new TnP Prime Series, now available. The TnP Prime Series provides a host of features and functions never before seen on any Test and Print unit, which now includes Bluetooth connectivity.

With solid 10Amp (WCM-TnP-Prime) and 20Amp (WCM-TnP-Prime-20A) capability, and the standard Meter Mode Function (providing instant power, voltage and current measurements), the Gen 6 TnP Prime Series boasts a comprehensive list of tests and analysis as required under the AS/NZS 3760:2022 Standards.

The TnP Prime Series testers feature Lithium Ion Battery technology. The freedom from mains power gives you greater versatility for your testing than ever before. The internal lithium ion pack comes with safety focused design and more capacity to run the tester and thermal transfer printing together for up to 3000 sets of tests and tag prints on one charge!

The new TnP Prime series design eliminates the need for a bulky external isolation transformer when testing portable RCD's. Our new advanced motherboard has isolation functionality built in, and is designed for high power efficiency and faster data processing and also comes with AC/DC power operation.

Our latest TnP Prime models now feature Bluetooth Connectivity. Using the WinPATS App, you can now connect your tester to compatible tablets, allowing you to control your tester, record results, create reports and more, all from the palm of your hand. The Bluetooth module features the latest Bluetooth Low Energy technology, which boasts 50 metre range and excellent battery life.

Designed and Manufactured in Australia to meet stringent testing requirements - some of the tightest in the world - the Gen 6 TnP Prime Series now sets its own new standard of reliability and ruggedness.
